

Infusion Center

We process new referrals for therapeutic infusion therapy (non-hematology/oncology diagnoses) for a variety of specialties.

These specialties include, but are not limited to: Gastroenterology, Nephrology, Neurology, and Rheumatology.

Key Points

Our coordinators are liaisons

Our coordination team communicates directly between our staff and referring providers to gather required medical records and schedule patient's first visit.

Our providers are on-site

The first appointment includes a consult with a Tennessee Oncology provider. Referred infusion patients are seen annually.

Referring specialists manage care

Tennessee Oncology providers oversee safe administration of medication. We maintain annual records and verify that referring specialists manage patient needs related to the referred diagnosis.
